

Hand Held Radar Gun

PR-1000

The PR1000 is a compact digital radar gun. Compared to a traditional shaped radar, the PR1000 is the size of an Apple iPhone. Offering outstanding value for money and the “no setup configuration” makes it a very popular choice on sites within the UK. Designed for Community Speedwatch Groups, the PR-1000 can measure a car moving up to 400ft away and the long detection range offers maximum safety for the user.

The PR-1000 Hand Held Radar Gun is a simple point and shoot model which is a cost-effective choice and ideal for Community Speedwatch Groups and Construction Sites. The Apple iPhone sized case houses the intelligent radar module which is capable at measuring a vehicle at over 300ft away. It also has an LCD display in built which displays the approaching vehicle speed and is capable of measuring speeds between 7-325mph. The low speed option allows the user to also measure slower moving vehicles such as fork lift trucks. The PR-1000 radar gun is powered by rechargeable AAA batteries which can offer up to 10,000 readings in operation. An option to recall the previous 10 recorded speeds are available.

Radar Module –

- Band
- Detection Range – Up to 400ft
- Speed Range – 7-325mph (kph)
- Measurement – MPH or KPH
- Average Speed Detection
- Continuous or Trigger Mode
